

# REVERB SLIM BIN DISPLAY

An all-natural, high quality THC beverage like Reverb was made to stand out from the pack, and there's no better way to do that than with the new Reverb Slim Bin displays!

The Reverb Slim Bin is made for cans going 3 wide x 4 deep so that it would have a narrow profile. It can fit TWO(2) 6-packs deep and TWO(2) high per shelf. For a total of FOUR(4) - 6-packs per shelf x FOUR(4) shelves – SIXTEEN(16) 6-packs total per unit.

The result is an eye catching display that highlights Reverb and allows it stand out, while also taking up a small footprint so that it can easily fit into stores of any kind. All while staying at an affordable price.
